
Help Front brake????

Posted by Jackfl - 2008/05/21 09:48

I have a 2006 Vento Phantera GT5. The front Brake handle flaps around freely. No resistance to handle to shut off brake light. and does not activate front brake. Please Help.

Thanks,
Jack

i had a similar problem with my 2006 vento phantera gt5, but with the rear brake. i just had to replace a bolt that was right by the top of the lever, as it had fallen out. see if yours is missing....if so that should do it.

hope this helps.
