
New jet for mycarb?

Posted by ventoscoot - 2008/07/15 01:58

I'm about to get crazy on my air intake on my 2007 Vento Phantom GT5 150cc. When I do, I don't think I will be able to adjust the air/fuel mix to get it right, and I think I will need to re-jet. OK, when you do this, do you need to do both jets, or just the main. If any one know what my jet is currently and has a suggestion about what the new jet should be I would appreciate the input.
