
no power from my r41

Posted by ratliff - 2008/07/06 16:11

:blush: i think i did a bobo! i took off the front pulley(or whatever its called) to the belt with impact wrench and replaced belt! then put back on with impact wrench. its starts fine but every time you put wieght on it, it stalls out and basically wont move!!!!!!!!!!!!!!

maybe put on to tight with impact wrench!!! help anyone!!! does this part need to be specally put on or what!!!! so flustered!!! hahahah!!!!!!!!!!!!!!

anyone,,,anyone:woohoo:
