
beeping turn signals

Posted by dirtybird - 2008/07/19 02:49

how can i silence the turn signals on my '06 phantera gt5?

i'm sure it's simple, but wanted to have an idea before i start taking things apart.

there is really only one way to do it without losing the directional signals on the dash. I got under the front cowling and just put some duct tape over the beeper. It is still there, but very quiet.
