
Help Gearcase oil ??????

Posted by Jackfl - 2008/05/21 09:45

I have a 2006 Vento Phantera. I am looking to fill the gear case oil but can not find the filler. Anyone KNow where it is? Please help.

Thanks,
Jack

Jack,
I got the following reply from David@vento.com.

Hi,
Thank you for using Vento Support !
With reference to our conversation, I have enclosed the Phantom Oil replacement procedure which is self explanatory.
Type of Engine Oil SAE 15W40
Engine Oil Tank Capacity 0.24 Gallons (0.9 Liters)

- Â· Remove the drain screw at the bottom.
- Â· It is easier to drain when the engine is warm.
- Â· Tighten the drain screw.
- Â· Pour proper quantity of oil slowly into the oil Plug opening.
- Â· Tighten the oil plug after fulfilling.

Type of Gear Oil : SAE 85W90
Amount of Gear Oil 0.03 Gallons (0.11 Liters)
Change in period for gear oil 1240 Miles (2000 Kms)

He sent a pdf with pics showing the locations of both drain and fill plugs for the transmission. The fill plug on the transmission is a bolt that is horizontal close to the back of the transmission. the transmission is right next to the rear wheel. The drain plug is at the bottom. The fill plug looks like a typical bolt with a different looking head. Easy to overlook! You might e-mail him and he will send you the pdf pics....
