
Red background

Posted by RonelyBaiku - 2007/11/28 06:01

Hi,

I find red background very annoying. It's hard to focus on the text because of red strokes on the left and right of the page
At least the tips for designers does not suggest to use intense colours for background.

Red is good just for accents.

Thanks

Marijus

I disagree, but we'll see about implementing maybe a straight black background on the upcoming weekend.

I wasn't digging the all black sidebars, so I flipped the image and made it fade from red to black instead of black to red.
It looks pretty nice, and hopefully this is what you were looking for as far as readability as well.

Let me know if you have any further issues!

Looks nice and ergonomic. Thank you! :)
